

SECURITY SERVICES

Accelerated detection, containment
and remediation of digital security
incidents with ESET expertise

What are ESET's Security Services?

ESET's Security Services work together with your ESET security products to deliver a complete security solution that acts preventively, reactively and proactively. It reinforces your IT security team with local support, in your language. ESET experts are ready to help if any serious security issues arise.

Investigate, identify and resolve any threats that penetrate standard defenses. This comprehensive service covers everything from basic malware investigation and removal to automated and manual file analysis; from incident investigation and response to digital forensics. With customized, integrated and proactive XDR services delivered by industry-leading experts, ESET enhances your protection against potential security issues. Together with our products, ESET's Security Services create a complete security solution that will:

- ◆ Provide above-standard product support
- ◆ Perform robust analysis of potentially harmful files
- ◆ Implement response and remediation steps to ensure business continuity
- ◆ Deliver IT security peace of mind
- ◆ Provide above-standard product support
- ◆ Ensure the operational continuity of your organization

Why choose ESET Security Services?

PROVEN EXPERTISE

Keeping up with the rapidly changing cyberthreat landscape can be challenging and is sometimes best left to experts. ESET has been living and breathing digital security for over three decades.

LACK OF HUMAN RESOURCES

Using new, complex security solutions can prove tricky, even for organizations with dedicated security or IT teams. The continued operation of new security products can also be an ongoing drain on internal IT resources – this could prevent the execution of core operations vital for business continuity.

LONG-TERM COSTS

Creating dedicated teams and/or hiring security specialists who have the necessary skills and qualifications to investigate, identify and respond to potential cybersecurity threats can result in high long-term costs.

SIMPLIFIED PROCUREMENT

Purchasing products and services from a single vendor reduces complexity for accounting and procurement departments—especially for multinational corporations that might otherwise be left with a large number of regional providers.

INFRASTRUCTURE COMPLEXITIES

Products from different vendors can lead to security stack, overlap and even conflict. Avoid this with 100% ESET digital security.

Choose the level of service that fits your organization's requirements

	ESET DETECTION AND RESPONSE ESSENTIAL	ESET DETECTION AND RESPONSE ADVANCED	ESET DETECTION AND RESPONSE ULTIMATE

What's inside?

ESET Detection and Response Essential

Enjoy a level of security above standard product support. This package focuses on security-related challenges that organizations face. It is designed to complement ESET protection products that are integrated into the organization's ecosystem and helps investigate, identify and respond to threats that penetrate standard defenses.

The offering covers everything from basic malware investigation and removal to automated and manual file analysis, incident investigation and response, and digital forensics.

What's inside?

ESET Detection and Response Essential

FAST, GUARANTEED RESPONSE

Speed of remediation is critical. ESET's assistance is available on demand to help address missing detections for malware and cleaning problems, investigate suspicious behavior and mitigate ransomware infections much faster, reducing business interruption and minimizing the impact of any attack.

SUPERIOR SUPPORT

You'll get the best of both worlds with ESET. Local support, in your language is readily available. This is combined with ESET HQ's technical expertise for an excellent ESET experience.

TAILORED APPROACH

Each organization is different. ESET experts partner with your team to develop a response and remediation plan that takes into consideration your operational specifics to develop a highly customized action plan that balances the business and security needs of your company.

INCIDENT INVESTIGATION AND RESPONSE

The service includes detailed file analysis, reverse engineering, digital forensics and digital forensic incident response assistance, covering the entire incident investigation lifecycle: from threat identification to analysis, subsequent remediation and actionable advice for addressing the root cause of recurring incidents.

What's inside?

ESET Detection and Response Advanced

ESET Detection and Response Advanced is a comprehensive security services package designed to complement ESET Inspect (EI), the XDR-enabling solution of the ESET PROTECT platform. It fuses the advantages of granular visibility provided by EI with the knowledge and experience of industry-leading experts to deliver improved detection, threat hunting, investigation, and targeted actions to eliminate threats.

The package covers everything from basic malware investigation and removal to file analysis, incident investigation and response, digital forensics, assistance with the correct use of ESET Inspect, and even on-demand threat hunting. It is best suited to ESET Inspect customers who have the human resources to manage their daily operations but want to ensure that the product is correctly optimized and customized for their organization.

What's inside?

ESET Detection and Response Advanced

INCLUDES ALL ESET DETECTION AND RESPONSE **ESSENTIAL** BENEFITS, PLUS THE FOLLOWING:

SUPPORT—RULES

Get support related to rule creation, modification, or disfunction, for example, to detect specific malware behavior. The specified rule or behavior is analyzed, and if it turns out to be a bug, we'll commence a consultation and provide recommendations on setting up the desired rule.

INITIAL OPTIMIZATION

If ESET Inspect generates a large number of false positives after installation in your environment, we'll initiate a one-time action to investigate (this might involve several rounds). The most frequent false positive detections in the EI environment are checked and exclusions are created. Custom rules might be created, or rules may be modified to reflect expectations.

SUPPORT—EXCLUSIONS

If you need support related to exclusion creation, modification, or disfunction, we'll analyze the specified exclusion or behavior and carry out a consultation. We'll then provide recommendations on how to set up the desired exclusion.

GENERAL SECURITY-RELATED QUESTIONS

If an EI security related question is not covered then we'll analyze the specified behavior. Following that analysis, we'll give you advice on the issue and developers will be asked to make improvements.

ESET INSPECT THREAT HUNTING (ON-DEMAND)

Get a one-time inspection of your IT environment to identify any threats present. EI carries out an inspection and provides information about found threats or weaknesses. We'll provide you with advice and define individual steps in a checklist.

What's inside?

ESET Detection and Response Ultimate

ESET Detection and Response Ultimate is a complete end-to-end solution built around ESET's XDR-enabling component, ESET Inspect. It helps organizations reap the full benefits of Detection & Response without having to build an in-house team of digital security experts or add additional resources to their existing team.

ESET experts deploy, optimize and manage daily operations so you can focus on your core business. ESET Detection and Response Ultimate covers all areas: from alert triage and investigation to file analysis, incident response, digital forensics, threat monitoring and even proactive periodic threat hunting.

30 years of fighting cybercrime by continuous innovation. ESET believes that the highest level of security can only be achieved by a combination of robust technology and human expertise.

What's inside?

ESET Detection and Response Ultimate

INCLUDES ALL ESET DETECTION AND RESPONSE **ADVANCED** BENEFITS, PLUS THE FOLLOWING:

PROACTIVE THREAT HUNTING

Investigates data, events and alarms generated by ESET Inspect. All client data remains secure while ESET threat hunters review highlighted alarms, investigate their root causes, and compile their findings into comprehensible status reports with actionable advice.

THREAT MONITORING

Enables users to navigate the large amount of data/events/alarms generated by ESET Inspect, prioritize potential threats/breaches and harness the tool's full potential— without having to change existing IT priorities. ESET experts monitor each client's data daily, issue alerts, compile clear reports and recommend action.

DEPLOYMENT AND UPGRADE

Installs and configures specific products in the client environment and provides training to ensure their successful operation, thus reducing the overall complexity associated with a new and upgraded endpoint security product, and ensuring business continuity. A thorough initial assessment before each execution or deployment ensures there are no surprises.

About ESET

For more than 30 years, ESET® has been developing industry-leading IT security software and services to deliver comprehensive, multilayered protection against cybersecurity threats for businesses and consumers worldwide. ESET has long pioneered machine learning and cloud technologies that prevent, detect and respond to malware. ESET is a privately owned company that promotes scientific research and development worldwide.
